## BOOK SYNOPSIS

This critical study traces the common origins of film noir and science fiction films, identifying the many instances in which the two have merged to form a distinctive subgenre known as Tech-Noir. From the German Expressionist cinema of the late 1920s to the present-day cyberpunk movement, the book examines more than 100 films in which the common noir elements of crime, mystery, surrealism, and human perversity intersect with the high technology of science fiction. The author also details the hybrid subgenres considerable influences on contemporary music, fashion, and culture.
